Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	

Brainstorm & Idea Prioritization Template:

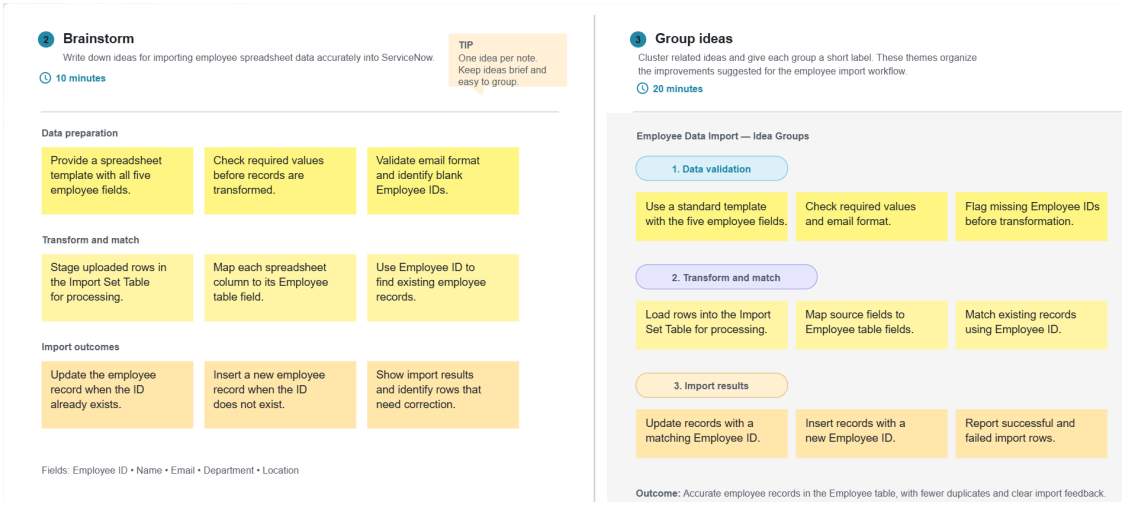

Brainstorming provides an open environment for the team to share creative ideas and find ways to improve the **Import Data using Transform Maps** project. Team members can suggest ideas for making employee data imports accurate, efficient, and easy to manage. All ideas are welcome during brainstorming, and the team can prioritize them afterward.

Possible ideas include providing a standard spreadsheet template with the required employee fields, validating data before import, and using Employee ID to update existing records or insert new employees. The team can also consider showing a preview before processing, displaying clear error messages for invalid rows, and providing a summary of successful and failed records after each import.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Step-2: Brainstorm, Idea Listing and Grouping

Step-3: Idea Prioritization
