**Project Design Phase-II**
**Solution Requirements (Functional & Non-functional)**

| | |
|---|---|
| Date | 3 October 2026 |
| Team ID | 6ab8c0438c7c66e7067306ef |
| Project Name | Import Data using Transform Maps (Spreadsheet) |
| Maximum Marks | |

**Functional Requirements:**

Following are the functional requirements of the proposed solution.

| FR No. | Functional Requirement (Epic) | Sub Requirement (Story / Sub-Task) |
|---|---|---|
| FR-1 | User Login & Access | Login through Username & Password<br>Role-based access for Admin / Officer |
| FR-2 | Project Data Management | Upload MPLAD project data<br>Add and update project details<br>Store beneficiary, cost and location details |
| FR-3 | Fraud & Anomaly Detection | Detect unusual project costs<br>Identify duplicate or suspicious projects<br>Detect inconsistencies in project details |
| FR-4 | Risk Analysis & Alerts | Generate risk score for projects<br>Highlight high-risk projects<br>Send alerts for suspicious activities |
| FR-5 | Dashboard & Reports | Display project statistics<br>Show detected anomalies and fraud cases<br>Generate downloadable reports |
| FR-6 | Data Visualization & Monitoring | Display project data using charts and graphs<br>Monitor project status and progress<br>View location-wise and department-wise project details |

**Non-functional Requirements:**

Following are the non-functional requirements of the proposed solution.

| FR No. | Non-Functional Requirement | Description |
|---|---|---|
| NFR-1 | **Usability** | The system should have a simple and user-friendly dashboard for officials. |
| NFR-2 | **Security** | The system should protect user and project data from unauthorized access. |
| NFR-3 | **Reliability** | The system should provide consistent and accurate results during fraud/anomaly detection. |
| NFR-4 | **Performance** | The system should process project data and display detection results quickly. |
| NFR-5 | **Availability** | The system should be accessible to authorized users whenever required. |
| NFR-6 | **Scalability** | The system should support increasing numbers of users, projects, and datasets. |
