Planning Logic

A Sprint is a fixed period or duration in which a team works to complete a set of tasks.

An Epic is a big task or project that is too large to complete in one sprint. It is broken down into smaller tasks (stories) that can be completed over multiple sprints.

A Story is a small task. It is part of an Epic. A Story Point is a number that represents how much effort a story takes to complete.

(Usually in the form of Fibonacci series)

1 – Very Easy task

2 – Normal task

3 – Moderate task

5 – Difficult task

Story Point – 5 (1, 2, 3, 5)

Sprint 1

Spreadsheet Data Collection (Epic 1)

Preparing Employee Data (USN1) – 2

Creating Spreadsheet (USN2) – 1

Import Set Configuration (Epic 2)

Creating Import Set Table (USN3) – 3

Uploading Spreadsheet Data (USN4) – 3

Validating Imported Data (USN5) – 3

Total Story Points in Sprint 1 = 2 + 1 + 3 + 3 + 3 = 12

Sprint 2

Transform Map Configuration (Epic 3)

Creating Transform Map (USN6) – 2

Mapping Employee Fields (USN7) – 2

Configuring Employee ID as Unique Identifier (USN8) – 2

Validating Field Mapping (USN9) – 3

Employee Table Processing (Epic 4)

Updating Existing Employee Records (USN10) – 5

Inserting New Employee Records (USN11) – 5

Total Story Points in Sprint 2 = 2 + 2 + 2 + 3 + 5 + 5 = 19

Total Story Points

Sprint 1 = 12

Sprint 2 = 19

Velocity = Total Story Points Completed / Number of Sprints

Total Story Points = 12 + 19 = 31

No. of Sprints = 2

Velocity = 31 / 2

15.5 Story Points per Sprint

Therefore, our team's velocity is 15.5 Story Points per Sprint.
